Virginia Birth-Related Neurological Injury Compensation Program May 7, 2014

The Board of Directors
Virginia Birth-Related Neurological Injury Compensation Program
7501 Boulders View Dr., Suite 210
Richmond, VA 23225

Dear Members of the Board:

The Comprehensive Annual Financial Report (CAFR) of the Virginia Birth-Related Neurological Injury Compensation Program (the Program) for the year ended December 31, 2013, is submitted herewith. This CAFR has been prepared by the Program's Finance Department in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) and conforms to the requirements of the Governmental Accounting Standards Board (GASB).

Responsibility for both the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures, rests with the Program. We believe the data, as presented, is accurate in all material respects; that the data is presented in a manner designed to fairly set forth the financial position and results of the operations of the Program as measured by the financial activity of its various accounts; and that all disclosures necessary to enable the reader to gain the maximum understanding of the Program's financial affairs have been included.

This letter of transmittal is designed to complement the Management's Discussion and Analysis (MD&A) and should be read in conjunction with it. The Program's MD&A can be found immediately following the independent auditors' report.

A brief history of the Program, its fiscal operations, and selected accomplishments are presented below.

Organization and Function

A lifetime of help

With soaring medical malpractice insurance rates and insurance companies on the brink of eliminating coverage in the mid-1980s, up to one quarter of the Commonwealth of Virginia's (the Commonwealth) obstetricians were threatened with having to close their office doors. To alleviate this crisis, the Commonwealth worked with stakeholders including physician associations, insurers, lawyers and others to develop an innovative solution; the Virginia Birth-Related Neurological Injury Compensation Program. The Program was a first of its kind nationally.

The Program's legislation presents a very specific definition of a "birth injury", which represents a very small number of births each year. By keeping many of the most expensive cases out of the court system, combined with a medical malpractice award cap, the medical malpractice insurance industry has been reasonably stabilized in the Commonwealth (especially when compared to other states) allowing physicians to do what they do best – treat patients.

Although the Program was created by the General Assembly of the Commonwealth, it operates as a separate organization. A nine member volunteer board appointed by the

7501 Boulders View Drive

Suite 210 Richmond, VA 23225

www.vabirthinjury.com

vvvv.vabirthinjury.info

Governor of the Commonwealth (the Governor) directs the Program. The Program is regulated by the Code of Virginia, which is very specific in how it operates.

All admissions are through the Virginia Workers' Compensation Commission; the Program itself does not admit claimants. Financial reports are filed annually with the Governor's office, the Virginia Senate and the Virginia House of Delegates. At least every other year, the State Corporation Commission is required to have an actuarial study of the Program conducted.

Entry into the Program does not provide for any pre-determined amount of compensation. The Program operates much like an insurance policy in that it pays for actual medically necessary costs and other legislatively stipulated benefits. Additionally, the Program is the payer of last resort in all situations. There is no cap on the total eligible lifetime costs for a claimant.

No federal or state funds are involved in providing services to claimants. Funding is derived only from legislatively allowed sources including participating physician fees, participating hospital fees, nonparticipating physician assessments and liability insurer assessments.

Major Initiatives

Participating physicians and hospitals are continuing to become more aware of the benefits of participation for themselves as well as their patients. A qualifying birth can occur despite the heroic efforts of everyone involved. When it does happen, entry into the Program is important to both families and health services providers.

During 2013, 703 physicians participated in the Program. Along with the coverage benefits of participation, physicians also receive a reduction or credit on their malpractice insurance premiums. During 2013, 36 hospitals were enrolled in the Program. According to estimates, approximately 90-95% of births are covered by the Program due to participating hospitals and doctors.

The Program covers expenses that insurance and other programs do not. Medically necessary expenses such as doctor and hospital visits, therapy, nursing care, and medical equipment are mandated by the guiding legislation. The Code of Virginia also provides a wage benefit paid to the claimant from age 18 to 65, and payment for legal expenses related to filing the claim. In addition, the Program provides benefits including handicapped accessible vans, handicapped accessible bedroom and bath additions to homes, rental assistance, and allowances for therapeutic toys, medical service dogs and experimental therapies.

The Program's administrative cost as a percentage of total expenses (administrative plus claimant) remain low at 7%.

Philosophy

The Program plays a unique role in the Commonwealth. As previously noted, the Program was established due to a need to improve the tort climate for medical care in the Commonwealth, with the specific purpose of keeping malpractice insurers writing policies. It accomplished the goal immediately. According to studies and anecdotal information from key players in the industry, the Program is still fulfilling this role.

However, over the past 25 years the more publicly visible role has become the Program's contribution to caring for this specific group of children. Here the information also shows that they receive more benefits and greater care than those utilizing the tort system.

In fact, an article written by an actuary who has studied the Program and a similar organization in Florida noted that such approaches are highly efficient as compared to tort remedies. He writes that the vast majority of money involved in the Program is used for claimant care whereas in the tort system substantial percentages of funds go to other purposes.

Along with striving for such efficiency, the Program has worked to assure its financial reserves receive maximum growth with minimum risk. This has been accomplished through careful planning and the use of a sophisticated investment policy and practice.

Financial Controls

The Deputy Director is responsible for establishing and maintaining an adequate internal control structure. In fulfilling this responsibility, estimates and judgments are required to assess the expected benefits and related costs of control procedures. The objectives of the control system are to provide the Program with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and are recorded properly to permit the preparation of financial statements in accordance with U.S. GAAP. The concept of reasonable assurance is based on the assumption that the cost of internal accounting controls should not exceed the benefits expected to be derived from the implementation. All internal control evaluations occur within this framework.

Independent Audit

The Program's guiding legislation (§38.2-5015B) requires an annual independent audit of the Program's financial records and transactions by an independent certified public accountant selected by the Board of Directors.

Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Program for its CAFR for the fiscal year ended December 31, 2012. This was the sixth consecutive year that the Program achieved this prestigious award. In order to be awarded a Certificate of Achievement, a governmental entity must publish an easily readable and efficiently organized CAFR. This report must satisfy both U.S. GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the requirements of the GFOA Certificate of Achievement and we are submitting it to the GFOA to determine its eligibility for another certificate.

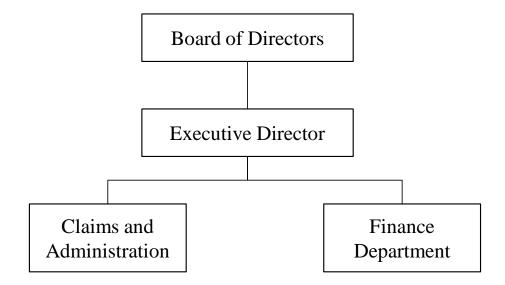

The staff of the Finance Department accomplished the preparation of this CAFR for the year ended December 31, 2013. We would like to express our appreciation to all members of the Finance Department who assisted and contributed to its preparation.

Respectfully submitted,

George Deebo Executive Director Candace Thomas, CGFM

Independent Auditors' Report

The Board of Directors
Virginia Birth-Related Neurological
Injury Compensation Program:

Report on the Financial Statements

We have audited the accompanying financial statements of the Virginia Birth-Related Neurological Injury Compensation Program (the Program) as of and for the year ended December 31, 2013, and the related notes to the financial statements, which collectively comprise the Program's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Program as of December 31, 2013 and the changes in its financial position and its cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the Management's Discussion and Analysis on pages 3 through 9 and the Claims Development Information on page 21 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Program's basic financial statements. The Introductory and Statistical Sections are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Introductory and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 7, 2014 on our consideration of the Program's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Program's internal control over financial reporting and compliance.

May 7, 2014

Management's Discussion and Analysis (unaudited)

December 31, 2013

This Section of the Virginia Birth-Related Neurological Injury Compensation Program (the Program) Comprehensive Annual Financial Report (CAFR) represents our discussion and analysis of the Program's financial performance during the fiscal years ended December 31, 2013 and 2012. Please read it in conjunction with the Program's basic financial statements and accompanying notes.

Financial Highlights

- The 2013 revenue from total fees and assessments increased by \$564,000 or 2.4%. Fees assessed from participating physicians increased \$115,400 or 2.8%, participating hospitals decreased \$66,000 or 1.9%, insurance companies increased \$202,000 or 1.7% and mandated physician fees increased \$312,000 or 7.5%. (An explanation of significant variances is included later in this report).
- The Program's total net position changed from a deficit of approximately \$98,700,000 in 2012 to \$81,775,000 in 2013. This is primarily due to a \$12 million decrease in operating loss and an increase of \$4.7 million in investment income from 2012.
- The Program provided approximately \$9,877,000 in nursing care, \$334,000 in therapy, \$538,000 for 14 handicapped accessible vans, \$554,000 for housing benefits, \$191,000 for durable medical equipment and technology, \$75,500 for hospital and physician visits, and \$465,800 for claimant legal fees.
- An additional 7 claimants became eligible to receive the wage benefit for a total of 47 eligible claimants. Eligible claimants may request and receive half of the average weekly wage of workers in the Commonwealth of Virginia in the private nonfarm sector. (See Virginia Code §38.2-5009.2) A total of \$892,000 was paid to the 38 eligible claimants requesting the benefit.
- The average cost per active claimant in 2013 and 2012 was approximately \$107,000 and \$105,000, respectively.
- As of December 31, 2013 there were 703 participating physicians, up 12 from 691 physicians in 2012. Participating hospitals remained the same at 36 in both 2013 and 2012.
- Administrative expenses were 7% and 9% of the total expenses (administrative plus claimant) paid in 2013 and 2012, respectively.
- As of December 31, 2013, 93 families received reimbursement for nursing or attendant care provided by a relative or legal guardian according to Virginia Code §38.2-5009 up 5 from 88 families in 2012. The Program began to reimburse family members for providing care beginning July 1, 2008.

3

Management's Discussion and Analysis (unaudited)

December 31, 2013

As of December 31, 2013, the Program had a total of 183 admitted claimants, 44 of which are deceased. During the year ended December 31, 2013, 5 claimants were admitted into the Program. Seven claimant petitions for admission were pending as of December 31, 2013. See chart below:

	Total December 31, 2012	2013 Activity	Total December 31, 2013
Admitted Deceased	178 44	5	183
Active	134	5	139

Overview of the Financial Statements

The Program's CAFR consists of four sections: introductory, financial, statistical, and compliance. The financial section consists of four components; the independent auditors' report, management's discussion and analysis (this component), the basic financial statements, and required supplementary information.

The basic financial statements include the Statement of Net Position, the Statement of Revenues, Expenses, and Changes in Net Position, the Statement of Cash Flows, and notes to the basic financial statements. The notes to the basic financial statements provide additional details for understanding information presented in the financial statements. The notes are followed by a section of required supplementary information that includes claims development information.

Management's Discussion and Analysis (unaudited)

December 31, 2013

Financial Analysis

Statements of Net Position

The following table reflects the summarized Statements of Net Position of the Program:

Table 1
Summarized Statements of Net Position
December 31, 2013 and 2012

(In millions)

	2013	2012
Current assets Noncurrent assets	\$ 24.6 359.2*	20.6 315.7*
Total assets	 383.8 🕏	336.3
Current liabilities	16.0	14.6
Noncurrent unpaid claims reserve: Admitted claims, less current portion Incurred but not reported claims	 293.6 132.4	282.7 115.5
Total unpaid claims reserve, noncurrent	 426.0	398.2
Total liabilities	442.0	412.8
Total deferred inflows	 23.5	22.2
Total liabilities and deferred inflows	 465.5	435.0
Unrestricted deficit	 (81.7)*	(98.7)*
Total net position	\$ (81.7)	(98.7)

^{*} Capital assets and net investment in capital assets are immaterial and are not subdivided.

At December 31, 2013 and 2012, the total assets of the Program were \$383.8 million and \$336.3 million, respectively; total deferred inflows and liabilities were \$465.5 million and \$435.0 million, respectively; and total net position was \$(81.7) million and \$(98.7) million respectively. The actuarial estimate of future claim payments of children born on or prior to December 31, 2013, plus the actuarial estimate of future claim administration expenses, exceeds the assets of the Program.

The \$43.5 million increase in noncurrent assets from \$315.7 million in 2012 to \$359.2 million in 2013 was due primarily to net investment income of \$36.6 million.

The total unpaid claims reserve at December 31, 2013 and 2012 was \$440 million and \$411.2 million, respectively. This represents the estimated cost for claimants currently admitted into the Program and an estimated number of not yet admitted claimants (incurred but not reported, (IBNR)) with birth dates prior to

Management's Discussion and Analysis (unaudited)

December 31, 2013

fiscal year-end that will be admitted to the Program subsequent to fiscal year-end. This reserve is based on a bi-annual actuarial study.

A summary of the net change in claims reserve is as follows (in millions):

	 2013	2012
Estimated future payments for claimants	\$ 25.8	24.8
Increase in provision for changes in methodology and assumptions	_	14.7
Estimated future payments for new claimants admitted	21.6	20.2
in prior years Estimated claim payments	21.6 (18.6)	20.2 (18.4)
Net change in claims reserve	\$ 28.8	41.3

The net change in claims reserve for the years ended December 31, 2013 and 2012 was an increase of \$28.8 million and \$41.3 million, respectively. The change in the claims reserve is consistent with the most recent actuarial report that estimates that assessment revenues and investment income is not sufficient to keep up with benefit payments and additional unpaid benefits liabilities associated with new eligible Program participants, whether admitted or not.

6

Management's Discussion and Analysis (unaudited)

December 31, 2013

Statements of Revenues, Expenses and Changes in Net Position

The following table shows the summarized Statements of Revenues, Expenses, and Changes in Net Position of the Program:

Table 2
Summarized Statements of Revenues, Expenses, and Changes in Net Position
Years ended December 31, 2013 and 2012

(In millions)

(in mimons)		Year ended December 31			
		2013	2012		
Operating revenues: Participating hospitals Participating physicians Mandated physician fees Insurance fees	\$	3.4 4.2 4.5 12.0	3.5 4.1 4.2 11.8		
Total operating revenues		24.1	23.6		
Operating expenses: Provision for claims, net General and administration	_	43.7 0.2	55.3 0.3		
Total operating expenses		43.9	55.6		
Operating loss		(19.8)	(32.0)		
Nonoperating revenue: Net investment income Miscellaneous		36.6 0.2	31.9		
Net nonoperating revenue		36.8	31.9		
Change in net position		17.0	(0.1)		
Net position at beginning of year		(98.7)	(98.6)		
Net position at end of year	\$	(81.7)	(98.7)		

Revenues

Revenues consist primarily of legislatively established assessments placed on participating and nonparticipating physicians, hospitals, and insurance companies and net investment income. Nonparticipating physicians pay the mandated physician fee. For the years ended December 31, 2013 and 2012, operating revenue was \$24.1 million and \$23.6 million, respectively, and nonoperating revenue was \$36.8 million and \$31.9 million, respectively.

Assessments for 2013 for participating and nonparticipating physicians were \$6,200 and \$300, respectively. Participating hospitals are assessed a fee of \$55 per live birth for the prior year, as reported by the Department of

Management's Discussion and Analysis (unaudited)

December 31, 2013

Health, not to exceed \$200,000. In 2013 and 2012, liability insurers paid one quarter of one percent on the net direct premiums written during the prior year.

Net investment income is \$36.6 million in 2013 and \$31.9 million in 2012, an increase of \$4.7 million. This is due primarily to an increase in net appreciation in fair value of investments of \$5.8 million from \$16.2 million in 2012 to \$22 million in 2013.

Expenses

For the years ended December 31, 2013 and 2012, expenses totaled \$43.9 million and \$55.6 million, respectively. The difference is primarily due to the net change in claims reserve which decreased to \$28.8 million in 2013 from \$41.3 million in 2012. The net change in the claims reserve is consistent with the most recent actuarial report that estimates that assessment revenues and investment income is not sufficient to keep up with benefit payments and additional unpaid benefits liabilities associated with new eligible Program participants, whether admitted or not (see above summary and explanation of claims provision). Expenses are comprised of general administrative and claims related expenses, the latter of which reflects both the increases in claims reserve and the claims paid during the year.

General administrative expenses include the portion of salaries, rent, cost of office equipment, and all other expenses not directly related to claims. Administrative expenses were 7% and 9% of the total expenses (administrative plus claimant) in 2013 and 2012, respectively. Management estimates that approximately 80% of the total administrative expenses are directly related to claims administration. Of the total administrative expenses of approximately \$1.1 million in 2013, approximately \$854,000 or 80% is related to claims and approximately \$213,000 is related to program administration. Of the total administrative expenses of approximately \$1.3 million in 2012, approximately \$1.05 million or 80% is related to claims and approximately \$262,000 is related to program administration.

Provision for claims includes the portion of general administration expenses related to claims and actual and future expenses related to claims. Claimant expenses include nursing, therapy, physician and hospital visits, prescriptions, housing, transportation, the wage benefit and durable medical equipment. Provision for claims, net has decreased from \$55.3 million 2012 to \$43.7 million in 2013. The change in the claims reserve is consistent with the most recent actuarial report that estimates that assessment revenues and investment income is not sufficient to keep up with benefit payments and additional unpaid benefits liabilities associated with new eligible Program participants, whether admitted or not (see above summary and explanation of claims provision).

Management's Discussion and Analysis (unaudited)

December 31, 2013

Economic Factors

Strong equity manager performance and a diversified portfolio allowed the Program's funds to gain 11.5% for the year and 4.2% in the fourth quarter. The portfolio's gross and net returns have matched or exceeded the index target returns. The asset allocation includes 49% stocks, 26% bonds 18% alternatives and 7% cash. Considering the recent economic challenges the markets have faced, the Board of Directors continues to focus on prudent asset allocations, risk assessment, disciplined rebalancing, manager due diligence, and adherence to a well developed investment policy.

As of December 31, 2013, 35% of the investment portfolio was invested in separate accounts, 44% in mutual funds, 19% in alternative strategies and 2% in real estate held in trust. The Board believes these actions together with the guidance from CapGroup, the Program's investment advisor, have significantly improved the investment strategy and will continue to enhance the financial position of the Program, which is an important factor in reducing the actuarial deficit.

Contacting the Program's Financial Management

This financial report is designed to provide users (e.g., citizens, taxpayers, claimant families, service providers and creditors) with a general overview of the Program's finances and to demonstrate the Program's accountability for the funds it receives. Questions concerning this report or requests for additional information should be directed to the Deputy Director, 7501 Boulders View Dr. Suite 210, Richmond, VA 23225, 804-330-2471 or visit our website at http://www.vabirthinjury.com.

NOTES TO BASIC FINANCIAL STATEMENTS

This page left intentionally blank

Notes to Basic Financial Statements
December 31, 2013

(1) Summary of Significant Accounting Policies

(a) Nature of Organization

The Virginia Birth-Related Neurological Injury Compensation Program (the Program) was established under the Virginia Birth-Related Neurological Injury Compensation Act (1987, c.540) (the Act). The Program is a related organization of the Commonwealth of Virginia of which elected officials are accountable as they appoint a voting majority of the Board of Directors (the Board). The Act creates a compensation program that assures lifetime care of infants with severe neurological injuries. The Program is funded through annual assessments of participating physicians and participating hospitals. Liability insurers and nonparticipating physicians contribute to the fund, if necessary, based upon actual experience of the fund. The Program receives no federal or state government funding.

(b) Basis of Accounting

The Program operates as an insurance enterprise fund subject to Governmental Accounting Standards Board (GASB) Codification Section Po20 – *Public Entity Risk Pools*.

The basic financial statements of the enterprise fund are presented on the accrual basis of accounting, using the economic resources measurement focus. Under this method of accounting, revenues are recognized when earned and expenses are recorded when liabilities are incurred without regard to receipt or disbursement of cash. The Program distinguishes operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and collecting fees in connection with the Program's principal ongoing operations.

(c) Use of Estimates

The preparation of the basic financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported financial statement amounts and disclosures. Accordingly, actual results could differ from these estimates.

(d) Administrative Expenses

Administrative expenses include salaries and benefits, rent, cost of noncapitalizable office equipment and other expenses not directly related to claims. In 2013, administrative expenses related to claims processing of approximately \$1,067,000 were allocated to provision for claims expense in the amount of approximately \$854,000 and to general and administrative expense in the amount of approximately \$213,000.

(e) Cash Equivalents

For purposes of the statement of cash flows, cash equivalents are defined as short-term, highly liquid investments that are both (a) readily convertible to known amounts of cash and (b) so near maturity that they present insignificant risk of changes in value because of changes in interest rates. Generally, the Program considers investments with original maturities of three months or less to be cash equivalents.

Notes to Basic Financial Statements
December 31, 2013

(f) Investments

At December 31, 2013, the Program's investments are stated at fair value based on quoted market prices, if available. The Program's investments consist of various index mutual funds and actively managed investments in separate accounts including large and small cap equities and fixed income securities. Mutual fund investments are valued at their quoted net asset value on the last trading day of the year. Equity securities are valued at the last reported sale price or, if no sale, the latest available bid price on the last business day of the year. Fixed income investments are valued using market evaluations (evaluated prices) from reputable and approved industry vendors and evaluations are based on available market data. All other investments, excluding real estate held in trust, are valued based on amounts provided by the investment advisor or fund administrator and reviewed by management.

Under guidelines established by the Board, the Program could, up until 1999, approve the purchase or construction of a home for the family of a claimant subject to certain restrictions. The home is held in a trust and remains the property of the Program, subject to use by the claimant's family during the term of the trust and subject to conditions imposed by the trust agreement. The trust expires upon the death or institutionalization of the claimant, and stipulates that during occupancy the family is responsible for the payment of utilities, general maintenance of the home, and certain other similar obligations. Real estate held in trust is carried at fair value based on third party appraisals, tax assessments, or other reasonable methodologies.

(g) Capital Assets

Capital assets with a cost of \$1,000 or more are recorded at cost. The costs of major improvements are capitalized while the cost of maintenance and repairs, which do not improve or extend the life of an asset, are expensed. Depreciation is provided over the assets' estimated useful lives of three to seven years using the straight-line method.

(h) Deferred Inflows of Resources

Deferred inflows represent amounts for which revenue recognition criteria have not been met. It is the Program's policy to recognize mandated assessments, participating doctor and hospital fees, and insurance fees on a pro-rata basis over the period in which the assessment or coverage is related, which is one year.

(i) Estimated Liability for Unpaid Claims

The liability for unpaid claims represents management's estimate, developed in conjunction with the assistance of the Commonwealth of Virginia's actuary, of the Program's discounted estimated cost of payments for both claimants admitted to the Program and an estimated number of not-yet-admitted claimants with birth dates prior to the date of the statement of net position that will be admitted to the Program subsequent to the date of the statement of net position. Changes in estimates of such costs are recognized in results of operations in the period in which the changes in estimate are made.

Notes to Basic Financial Statements

December 31, 2013

The development of liabilities for future benefit requires management to make estimates and assumptions regarding mortality, morbidity, lapse, expense, and investment experience. Such estimates are primarily based on historical experience and future expectations of these assumptions. The Program's actual incurred losses may vary significantly from the estimated amount included in the Program's financial statements. Management monitors actual experience and, if circumstances warrant, revises its assumptions and the related future policy benefit estimates.

(2) Deposits and Investments

The Program's deposit and investment portfolio consists of the following at December 31, 2013:

Cash and cash equivalents	\$	24,110,443
Investments:		
Mutual funds:		
Large cap		13,218,793
U.S. fixed income		66,217,121
International fixed income		17,698,579
International growth		24,895,506
International value		22,986,010
Emerging markets		13,300,540
Alternative strategies		66,632,505
Separate accounts:		
Large cap growth		21,839,044
Large cap value		40,886,880
Small cap value		12,859,895
All cap growth		19,689,009
Core fixed income		32,437,993
Real estate held in trust	_	6,451,145
Total investments	_	359,113,020
Total cash and cash equivalents and		
investments	\$ _	383,223,463

(a) Deposits

All cash of the Program is maintained in accounts collateralized in accordance with the Virginia Security for Public Deposits Act, Section 2.2-4400 et. Seq. of the Code of Virginia or covered by federal depository insurance.

(b) Investments

In accordance with the Virginia Birth-Related Injury Compensation Act, Section 38.2-5016 of the Code of Virginia, the Board is given the authority to invest the Program's funds in a careful and prudent manner at the advice of the investment advisor.

Notes to Basic Financial Statements
December 31, 2013

Credit risk: – The Program's Investment Policy states that no more than 20% of the fair value of the fixed income portfolio shall be rated less than single "A" quality. The Program's fixed income portfolio at December 31, 2013 is as follows:

	_	Rating		Fair value 2013	Percent of portfolio	Average maturity (in years)
Mutual funds:						
Vanguard Bond Index	(1)	AA	\$	10,832,510	3.1%	7.5
Western Asset Core Plus	(1)	AA		16,735,867	4.7	9.2
Loomis Sayles Global						
Bond Fund	(1)	A1		17,698,579	5.0	7.2
PIMCO Total Return Fund	(1)	AA-		19,411,181	5.5	6.0
JP Morgan Strategic Income	(1)	BB		19,237,563	5.5	4.1
Separate accounts:						
Richmond Capital						
Management	(2)	AA	_	32,437,993	9.2	7.0
Total			\$_	116,353,693		

- (1) Average credit quality per Capital Advisory Group, Morning Star and fund company websites.
- (2) Average credit quality per Bond Edge Fixed Income Analytic models.

Interest rate risk: – The Program does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The Program mitigates risk through relatively conservative asset allocations and investments.

Foreign currency risk: — The Program manages its risk associated with foreign currency fluctuations with the asset allocations outlined in its Investment Policy that limit its investments in international developed and emerging index funds up to 21% of its overall portfolio. The Program's investments subjected to foreign currency risk at December 31, 2013 include U.S. publicly traded mutual funds which have an international strategy totaling \$78,880,635.

Custodial credit risk: — Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Program will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party. The Program's deposits are maintained in accounts collateralized in accordance with the Virginia Security for Public Deposits Act, Section 2.2-4400 et. Seq. of the Code of Virginia or covered by federal depository insurance. In addition, it is the Program's practice, although not a formal policy that the investment accounts are held in the Program's name. The Program's investment policy states that all fixed income securities held in the portfolio shall have a Standard & Poor's and/or equivalent credit quality rating of no less than Investment Grade. No more than 20% of the fair value of the fixed income portfolio shall be rated less than single "A" quality.

Notes to Basic Financial Statements

December 31, 2013

The Program's return on investments for the year ending December 31, 2013 is summarized as follows:

Interest income	\$ 1,497,379
Dividend income	6,078,244
Realized gain on investments, net	7,889,723
Net appreciation in fair value of	
investments, net	21,976,553
Investment fees	(777,480)
Fiduciary fees	(59,814)
Net investment income	\$ 36,604,605

(3) Capital Assets

Capital assets at December 31, 2013 and the related changes for the year ended were as follows:

	_	January 1, 2013	Increases	Decreases	December 31, 2013
Computer equipment	\$	59,274			59,274
Office equipment		40,938	2,235		43,173
Automobiles	_	17,237			17,237
		117,449	2,235		119,684
Less accumulated depreciation	_	(96,912)	(7,811)		(104,723)
Capital assets, net	\$_	20,537	(5,576)		14,961

(4) Estimated Liability for Unpaid Claims

The estimated liability for unpaid claims is the discounted estimated cost of payments for both claimants admitted to the Program and an estimated number of not-yet-admitted claimants with birth dates prior to the date of the statement of net position that will be admitted to the Program subsequent to the date of the statement of net position. This discounted cost represents the amount that would need to be invested, as of the date of the statement of net position, to pay the claimant expenses as they become due. The liability is determined based on an actuarial study, which is mandated to be performed no less frequently than biennially. Eligible costs under the Program are costs not otherwise paid by private insurance or other government programs. Costs include nursing, housing, hospital and physician visits, physical therapy, vans, medical equipment, prescription drugs, various other incidental items, loss of earnings, and claim filing expenses.

In general terms, the estimated liability for unpaid claims is determined as follows:

(1) The total number of claimants is estimated (actual number of admitted claimants plus estimate of the number of not-yet-admitted claimants born prior to year-end).

Notes to Basic Financial Statements

December 31, 2013

- (2) Future payments, by category of expense paid for each claimant, are forecasted. These estimates are based on the actual payments made by the Program on behalf of the claimants who had been in the program for three or more years as of December 31, 2013 (taking into consideration each claimant's insurance coverage and eligibility for Medicaid), as well as assumptions regarding future cost of inflation and future increases in the utilization of the benefits and services of the Program.
- (3) Projected future payments to each claimant are adjusted to reflect an assumed life expectancy for each claimant and the time value of money.

The estimated liability for unpaid claims is forecasted based on actual information through the prior fiscal year.

Significant actuarial assumptions for 2013 include:

Rate of claims inflation (varies based on category of expense) Investment earnings/discount rate	2.59% - 4.79% 5.25%
Mortality: Life expectancy at: Birth Age 3	28.4 years 29.2 years
Estimated number of not-yet-admitted claimants born prior to year end. Estimate is based on review of how long it takes for claimants to be admitted to the Program.	42

The total number of claimants (admitted claimants and not-yet-admitted claimants) is estimated to be 225 as of December 31, 2013.

18 (Continued)

Notes to Basic Financial Statements
December 31, 2013

The following represents changes in the unpaid claims reserves for the Program for the year ended December 31, 2013:

	_	2013	2012
Unpaid claims and claim adjustment expenses at beginning of year	\$	411,200,000	369,900,000
Incurred claims:			
Estimated future payments for new claimants admitted in current year Estimated future payments for new claimants admitted in		25,800,000	24,800,000
prior years	_	21,600,000	20,200,000
Total incurred claims		47,400,000	45,000,000
Claims payments:			
Estimated claims payments for claimants admitted in current year Estimated claims payments for claimants admitted in prior		(1,700,000)	(1,700,000)
years		(16,900,000)	(16,700,000)
Total estimated claims payments		(18,600,000)	(18,400,000)
Increase in provision for change in methodology and assumptions	_		14,700,000
Unpaid claims and claim adjustment expenses at end of year	\$	440,000,000	411,200,000

The total undiscounted unpaid claims and claim adjustment expenses amount to \$1,744.6 million at December 31, 2013 and represent unaudited estimates.

19 (Continued)

Notes to Basic Financial Statements

December 31, 2013

(5) Employee Benefits

The Program pays each employee an amount equal to 27% of his or her salary in lieu of a benefits package. This additional salary is to be used by the employee to acquire certain benefits, if they so choose, and is subject to income and payroll taxes. Additional benefits paid by the Program to its employees includes the 27% of salary, employer paid portion of health insurance, life insurance and long and short term disability insurance and amounted to \$150,900 for the year ending December 31, 2013.

(6) Operating Lease Commitments

The Program leases its office space under an operating lease expiring in September 2018. Rent expense totaled \$32,442 for the year ended December 31, 2013.

Future minimum obligations under this lease are as follows:

2014	\$ 54,617
2015	55,583
2016	57,255
2017	58,959
Thereafter	45,359

(7) Liquidity

The most recent actuarial study performed for the year ended December 31, 2013, which used claims data as of December 31, 2011, determined that the Program was not actuarially sound. However, the actuarial study did point out that the Program is not in any immediate danger of defaulting on the payment of benefits and that the Program has sufficient assets to continue to pay for claimants' benefits for the subsequent thirty years.

(8) Contingencies

Various pending and threatened lawsuits claim eligibility for program benefits. Management believes the Program's claims reserves based upon actuarial assumptions are adequate to provide for the ultimate resolution of these claims.

Note to Required Supplementary Information
December 31, 2013

(1) Claims Development Information

The table on the preceding page illustrates how the Program's earned revenue, investment income and miscellaneous income compare to related costs of loss and other expenses assumed by the Program as of the end of each of the previous ten years. The rows of the table are defined as follows: (1) This line shows the total of each year's gross earned premiums and reported investment income and miscellaneous income. (2) This line shows each year's other operating costs of the Program including overhead and loss adjustment expenses not allocable to individual claims. (3) This line shows the Program's gross incurred losses and allocated loss adjustment expense and net incurred losses and loss adjustment expense (both paid and accrued) as originally reported at the end of the year in which the event that triggered coverage occurred (called birth year). (4) This Section of ten rows shows the cumulative net amounts paid as of the end of successive years for each birth year. (5) This line shows the latest re-estimated amount of losses assumed by re-insurers for each birth year. (6) This section of ten rows shows how each birth year's net incurred losses increased or decreased as of the end of successive years. (This annual re-estimation results from new information received on known losses, reevaluation of existing information on known losses, and emergence of new losses not previously known). (7) This line compares the latest re-estimated net incurred losses amount to the amount originally established (line 3) and shows whether this latest estimate of losses is greater or less than originally thought. As data for individual birth years mature, the correlation between original estimates and re-estimated amounts is commonly used to evaluate the accuracy of net incurred losses currently recognized in less mature birth years. The columns of the table show data for successive birth years.

Notes:

Insurance companies pay one quarter of one percent of net direct premiums written in Virginia, however, only the liability portion of the premium is assessable as determined by the Virginia Workers Compensation Commission.

Legislation states (§38.2-5020 E) that if required to maintain the Program on an actuarially sound basis, liability insurers shall pay an assessment to the Program.

The September 2002 actuarial report estimated that the fund was not actuarially sound as of December 31, 2001. Beginning with year 2002 through 2013, the liability insurers were assessed one quarter of one percent of net premiums written.

Legislation states (§38.2-5020 G) that if the Virginia State Corporation Commission determines the Program is actuarially sound it will suspend the assessment on nonparticipating physicians.

The September 2002 actuarial report estimated that the fund was not actuarially sound as of December 31, 2001. Beginning with year 2002 through 2013, nonparticipating physicians were required to pay the assessment.

Notes:

State law allows a physician to be exempt from paying the mandated assessment if one of the five following criteria are met:

- El. Employed by the Commonwealth of Virginia or federal government and income from professional fees from a source other than the Commonwealth of Virginia or federal government is less than 10% of annual salary.
- E2. Enrolled in a full-time graduate medical education program accredited by the American Council for Graduate Medical Education.
- E3. Retired from active medical practice.
- E4. Engaged in active clinical practice that was limited to the provision of services, voluntary and without compensation, to any patient of any clinic organized in whole or in part for the delivery of health care services without charge.
- E5. Not practicing medicine in Virginia (either not currently practicing or practicing in another state).
- E6. The above exemption numbers are due to undeliverable addresses returned by the Post Office.

Physicians that are delinquent as of year end are turned over to the Virginia State Corporation Commission, Division of Insurance.

Legislation states (§38.2-5020 E) that if required to maintain the Program on an actuarially sound basis, liability insurers shall pay an assessment to the Program.

The September 2002 actuarial report estimated that the fund was not actuarially sound as of December 31, 2001. Beginning with year 2002 through 2013, the liability insurers were assessed one quarter of one percent of net premiums written.

Legislation states (§38.2-5020 G) that if the Virginia State Corporation Commission determines the Program is actuarially sound it will suspend the assessment on nonparticipating physicians.

The September 2002 actuarial report estimated that the fund was not actuarially sound as of December 31, 2001. Beginning with year 2002 through 2013, nonparticipating physicians were required to pay the assessment.

Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

The Board of Directors
Virginia Birth-Related Neurological
Injury Compensation Program:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the basic financial statements of Virginia Birth-Related Neurological Injury Compensation Program (the Program), which comprise the statement of net position as of December 31, 2013, and the related statements of revenues, expenses and changes in net position and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated May 7, 2014.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Program's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Program's internal control. Accordingly, we do not express an opinion on the effectiveness of the Program's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Program's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Program's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Program's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
